

Partnering with Schools

Boston Online High School – a proud online Cambridge International Associate and a member of the Boston City Campus group of companies.

Cambridge now allows registered schools to offer online schooling to their registered learners (fully online or as a blended learner). Schools need to apply to Cambridge to extend their eligibility to offer Cambridge online (refer to your local Cambridge representative for more details). All exams and assessments must be taken at your school. This is where Boston Online High School can partner with you to power your online offering to your registered learners.

The Boston City Campus group was founded in 1991. The group has 47 campuses, 35 000 students and wide variety of offerings ranging from Cambridge Secondary Schooling, skill-based programmes to tertiary education including Accredited Higher Certificates, Diplomas, Degrees and Post Graduate Qualifications. The Boston group has been a leader in online education for many years and has invested significantly in developing technology to provide a comprehensive offering of online educational resources and technologies.

Boston Online High School offers tuition towards Cambridge IGCSE, Cambridge AS subjects as well as a number of programmes designed to assist students in bridging programmes for core subjects such as mathematics and English which would also align to lower secondary curriculum.

Being a member of the Boston group, provides access to a number of extracurricular programmes which we are able to make available to high school students to provide them with a well-rounded experience and also allow for interaction between students providing an opportunity for social interaction. These programmes include digital music production, online chess, coding and app development, online sports development programmes, public speaking and debating society as well as a number of personal development programmes.

As a Cambridge Associate, Boston allows schools the opportunity to offer a Cambridge online education under the banner of the school.

Boston will provide the school with the technology, infrastructure, systems, content and reporting to allow you to provide a comprehensive online education.

A limited number of select schools, will receive the following:

- a. A white labeled online learner management system (LMS) which will be set up for the school, the look and feel of this site will be that of your school so that the student will be registering via a site set up for your school.*
- b. Set up and maintenance of the LMS and servers.*
- c. The ability to register its students under that white labeled LMS*
- d. Teacher login accounts*
- e. The option to receive live lessons*
- f. The ability for teachers to upload their content onto the white labeled LMS*
- g. Teacher training as to how to upload content onto the LMS*
- h. Reports of student participation and progress on a regular basis*
- i. Access to a central library of digital asynchronous content in select subjects*
- j. Access to projects and once a week flipped classes summarizing the projects for select subjects*
- k. Access to assessments and mock exam preparation.*
- l. Access to additional extra mural programs*

As a result of the fact that this would represent a strategic partnership whereby we collaborate to ensure Cambridge candidates receive a quality education, we are offering this opportunity to a select number of schools.

We would value the opportunity for you to join a webinar where we explain the model. Should you be interested in taking advantage of this opportunity please do not hesitate to contact me directly.

*Kind Regards
Eli Katz
